## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

2. Claims 1-18 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. A cement admixture has to contain cement. Otherwise it is an admixture for cement (claims 1-18). The word "type" renders claims 5-12 indefinite. When "executing" a cement composition the means of execution should be specified. For example: gallows, firearms, electric chair, lethal injection etc. Mixing or blending maybe (claims 15-18)? Claims 17-18 contain improper Markush language. When the last conjunction is "and", the proper Markush language is "selected from the group consisting of".

### ***Double Patenting***

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

Art Unit: 1714

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1-18 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-12 of U.S. Patent No. 6,911,494.

Although the conflicting claims are not identical, they are not patentably distinct from each other because the equivalence of maleic acid and monocarboxylic acids is shown in column 9, lines 33-49 and the additives can be found from column 22, line 3, through column 4, line 11 (sulfonic acid type dispersants), column 25, lines 14-33 (retarders) and column 25, lines 34-41 (accelerators).

### ***Claim Rejections - 35 USC § 102***

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claims 1-18 are rejected under 35 U.S.C. 102(b or e) as being anticipated by Yamashita et al. 6,911,494, Nippon Shokubai JP-2003-12358, Nippon Shokubai JP-2002-348160 or Nippon Oil & Fats JP-7-215746.

8. Yamashita et al. disclose a blend of a copolymer of an unsaturated polyalkylene glycol ether monomer and an unsaturated carboxylic acid monomer, an unsaturated polyalkylene glycol ether monomer and an unpolymerizable polyalkylene glycol in claim

Art Unit: 1714

1. The unsaturated carboxylic acid can be maleic acid, maleic anhydride and salts thereof (column 9, lines 33-49, Calculation Examples 2 and 3). Sulfonic acid type dispersants are shown from column 22, line 3, through column 23, line 11, while retarders and accelerators are listed in column 25, lines 14-41. Mixing at 20°C is described in the paragraph overlapping columns 42-43. As far as the three Japanese references are concerned, the examiner who does not read or speak Japanese accepts the conclusions of the International Search Report without any reservations. Applicants' claims are not novel.

***Claim Rejections - 35 USC § 103***

9. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

10. Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamashita et al. 6,911,494, Nippon Shokubai JP-2003-12358, Nippon Shokubai JP-2002-348160 or Nippon Oil & Fats JP-7-215746.

11. All references have been discussed already. It would have been obvious to one having ordinary skill in the art; at the time the invention was made, to select applicants'

ingredients from a list of equivalents.

12. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Peter Szekely whose telephone number is (571) 272-1124. The examiner can normally be reached on 7:00 a.m.-5:30 p.m. Tuesday-Friday.
